

Technical workforce training in applied AI, operational data, and predictive maintenance.

Virdi Technical Services LLC DBA Pamisva | Built, licensed, or taught | In person or virtual

Company overview

Pamisva builds, licenses, and teaches technical training for organizations that run connected equipment and cannot afford downtime. Training focuses on what people do between detection and failure: reading the signal, deciding, and acting. Courses are delivered by an organization's own instructors or by Pamisva.

Core competencies

Curriculum licensing. Complete courses with lectures, labs, assessments, and instructor guides.

Custom course development (PSC U008, U009). Curriculum built to a program's format, self-paced or classroom-ready.

Program design and instruction. Multi-session programs with applied work between sessions and outcome measurement.

Workshops and intensives. Half-day and full-day sessions, curriculum audits, and gap reviews.

Course lines

PM-01
Reducing Unplanned Downtime with Condition Data

6 modules, 18 to 24 contact hours

BI-01
Turning Operational Data into Decisions

6 modules, 18 to 24 contact hours

AI-01
Applied AI in Industrial Operations

6 modules, 18 to 24 contact hours

Differentiators

- **Practitioner-built.** Written from current work in connected industrial products, data, and AI.
- **Decision-focused.** Complements specialist certification by training teams to act on condition data.
- **Proof before purchase.** A complete sample module is published free at pamisva.com.
- **Right-sized for small awards.** Suited to task orders, BPA calls, and purchase orders, with virtual-first delivery.
